**AUSTIN**

**THE ONE CODING AND BILLING CONFERENCE YOU CAN'T AFFORD TO MISS**

# Announcing CROWN<sup>®</sup> 2026

In Person: December 8 - 10, 2025

## The Line, Austin, TX

**Virtual: January 20 - 22, 2026**

Get the crucial coding and reimbursement updates you need at the industry's premier coding and reimbursement seminar. You won't want to miss it! Visit: [www.rccsinc.com/crown](http://www.rccsinc.com/crown) for more information and to register.

Sessions include (subject to change): Radiation Oncology, Diagnostic Imaging, Interventional Radiology Procedures, Radiology Compliance and E/M Services, Medical Oncology and Infusion Centers (**virtual only**), and Comprehensive Cardiology (**virtual only**)

#### Each Registration Includes:

- Continuing education units
- 2026 Reference Guide (up to \$289 value)
- 25% off purchases during session
- \$50 Coupon to use in 2026

Are you ready for the coding and billing changes, updates, and challenges coming in 2026? The industry's leading experts from RCCS will get you prepared with both virtual and in-person options. CEU-eligible!

**Are you ready for the coding and billing changes, updates, and challenges coming in 2026? The industry's leading experts from RCCS will get you prepared with both virtual and in-person options for three day CEU-eligible training at the world's best coding and billing seminar series - CROWN®.**

**Diagnostic Imaging:** Are you ready for 2026? The New Year brings new codes, new reporting rules, and new regulatory challenges. Get the information you need to succeed by attending RCCS' Diagnostic Radiology CROWN session. This fast-paced session will give you all this, and more:

- New codes for new technologies
- Tips & Traps for all Modalities
- Regulatory requirement updates including supervision
- CEUs Applied For: AAPC, ARRT, AHIMA, and RCCB

**Interventional Radiology Procedures:** There are **BIG** changes to interventional radiology procedure codes coming in 2026. Are you ready? This session will give coding and billing professionals the information they need to submit accurate claims for interventional radiology services in 2026.

- In-depth review of the new lower extremity revascularization codes
- Diagnostic angiography and additional subselective imaging
- Challenging transcatheter procedures – lower extremity revascularization, dialysis circuit, embolizations, thrombectomy with infusion therapy
- Nonvascular procedures including biliary, urinary, biopsies, aspirations and more
- CEUs Applied For: AAPC, ARRT, AHIMA and RCCB

**Radiology Compliance & E/M Services:** Physician supervision, test orders, unbundling, Advance Beneficiary Notices . . . Sometimes the list of radiology compliance hazards seems endless. This session is designed to make sense of the chaos. This one-of-a-kind session will address the complex topics of Radiology Compliance and E/M in Radiology, including:

- Detailed information of the E/M code definitions and guidelines for services performed by radiologists
- Federal fraud and abuse laws and initiatives
- Physician supervision, orders for diagnostic tests, maximizing radiology extenders, and more!
- CEUs Applied For: AAPC, ARRT, AHIMA, and RCCB

**Radiation Oncology (2 Day Session):** There are **BIG** changes to radiation oncology codes coming in 2026. Are you ready? Whether you're working in a hospital, physician practice, or freestanding radiation treatment center, this session is your ticket to documenting and billing for specialty and external beam radiation oncology services in 2026, including topics such as:

- External beam and IGRT code changes and updates effective for 2026
- Coding for services performed and documented in a radiation center, including payer instructions and published requirements for documentation
- Complex coding and reimbursement for SRS/SBRT, proton therapy, brachytherapy, hyperthermia, radiopharmaceuticals and IORT
- Reimbursement and coding differences per technique and practice setting
- CEUs Applied For: AAPC, ARRT, and AHIMA

Note: this is a two-day session; both courses must be purchased. Day 1: Radiation Oncology Core Essentials. Day 2: Radiation Oncology Special Procedures and Beyond

**Medical Oncology & Infusion Centers (offered virtually only – no in-person session):** The coding rules for drug administration are complex, and it's easy to make errors. This session is designed to help you make sense of the rules and apply them correctly, covering the following topics and much more:

- ICD-10-CM coding reminders for neoplasms and complications of care
- Tips for calculating and reporting additional hours of infusion
- Real-life examples of infusion encounters including chemotherapy, therapeutic drugs, and hydration
- CEUs Applied For: AAPC, ARRT, and AHIMA

**Comprehensive Cardiology (offered virtually only – no in-person session):** If you're involved in coding and billing for cardiology services, it's been a challenge to keep up with all the code and guidance changes over the past several years and there are more big changes for 2026. This session will cover the following topics and MUCH more:

- In-depth review of the new TBE and lower extremity revascularization codes
- Coding guidelines and bundling issues related to a wide range of cardiology services
- E/M services
- Hot topics in cardiology coding, focusing on procedures that are difficult to code and/or controversial
- CEUs Applied For: AAPC and AHIMA
